Eriez® Flotation Division Continues to Expand and Advance Testing Services

Delta, BC—[Eriez Flotation Division \(EFD\)](#) continues to make investments in equipment and resources to advance and expand its testing services to meet growing demand. With more than 15,000 square feet of dedicated [laboratory](#) space and an array of lab and pilot equipment, EFD has the capability to test and provide detailed analysis and state-of-the-art solutions for nearly any minerals processing application.

The company's [Central Test Lab \(CTL\)](#), located in Erie, Pa., houses a vast assortment of bench and pilot scale flotation laboratory equipment as well as products from the company's [magnetic](#), [vibratory](#) and [metal detection](#) lines. With additional analytical capabilities—including an XRF (x-ray fluorescence), ICP (inductively coupled plasma) and sulfur analyzer—EFD can quickly conduct in-house assays and improve turnaround time on testing.

Typical tests range from exploratory batch testing to the evaluation of multi-stage flotation circuits. Testing includes bench-top flotation testing, batch and continuous milling (ball, rod), hydraulic classification, steady state column flotation testing and high and low gradient magnetic separation. The EFD team also provides in-field evaluations.

“Our staff, which includes more than 15 highly educated mineral processing engineers, excels at improving plant performance by conducting thorough circuit evaluations, determining optimum operating conditions and finding solutions,” says Eric Yan, EFD Deputy Managing Director. According to Yan, recent notable work includes large-scale flow sheet development projects for clients in phosphate, potash and sulfide mineral industries.

Customers who wish to learn more or submit samples for testing should contact EFD or go to <http://erieznews.com/nr442>. To meet with EFD personnel at an upcoming 2018 trade show, visit the team at [SME](#) booth 1914 or [PDAC](#) booth 6302N.

About Eriez Flotation Division

Eriez Flotation Division (EFD) is a world leader in advanced flotation technology and is a wholly owned subsidiary of Eriez Manufacturing Co. EFD provides advanced testing and engineering services, in addition to sparging and column flotation equipment for the mining and mineral processing industries. For more information, visit www.eriezflotation.com or call (814) 835-6000. We can also be contacted at efdusa@eriez.com.
