Eriez® Flotation Division (EFD) Announces 100 Percent Growth in Testing and Technical Services Business

Erie, PA—[Eriez® Flotation Division \(EFD\)](#) announces that its [technical services business](#) has doubled since 2015. Eriez maintains an assortment of bench and pilot-scale equipment for both laboratory and in-field evaluations. EFD conducts on-site testing for clients at its 15,000-square-foot [Central Test Lab \(CTL\)](#) which is located within the Eriez Wager Rd. plant in Erie, PA.

EFD can test and provide detailed process analysis and state-of-the-art solutions for nearly any application. In addition to testing, [technical services](#) are performed by a large team of mineral processing engineers. EFD's highly experienced and qualified team is available to evaluate process flowsheets and conduct field trials and start-ups.

Eriez' [on-site testing services](#) provide quantitative data generated on a demonstration scale in the plant environment. EFD also excels at improving plant performance by conducting thorough circuit evaluations, determining optimum operating conditions and finding solutions for common problems.

While Eriez has consistently maintained a broad range of test equipment, the company made significant investments recently to further extend its in-house analytical capabilities and meet growing demand. In addition to flotation equipment, [CTL](#) houses all of [Eriez' core products](#)--such as magnets, vibratory, screening, metal detection and filtration equipment-- as well as an XRF (X-Ray Fluorescence) analytical machine and ICP-OES (Inductively Coupled Plasma Optical Emission Spectrometry) for assay determination. This allows Eriez to conduct in-house metallurgical control analyses to allow for faster turnaround for its customers.

"The past year has been full of great opportunities and growth for testing services," says Eric Yan, EFD Deputy Managing Director. "We have been working on several large-scale flowsheet development projects for clients in phosphate, potash and sulfide mineral industries. We also have some exciting processes which allow our clients to recover their waste streams." He adds, "We look forward to continuing to expand and advance our testing services offerings to support our valued customers."

Eriez Flotation Division (EFD) is a world leader in advanced flotation technology. Formerly known as Canadian Process Technologies, Inc., EFD is a wholly owned subsidiary of Eriez Manufacturing Co. EFD provides advanced testing and engineering services, in addition to sparging and column flotation equipment for the mining and mineral processing industries. For more information, visit www.eriezflotation.com or call toll-free at 888-300-3743 within the U.S. and Canada. We can also be contacted at efdusa@eriez.com.

Eriez is recognized as world authority in separation technologies. The company's magnetic lift and separation, metal detection, fluid filtration, flotation, materials feeding, screening, conveying and controlling equipment have application in the process, metalworking, packaging, plastics, rubber, recycling, food, mining, aggregate and textile industries. Eriez manufactures and markets these products through 12 international facilities located on six continents. For more information, call toll-free (888) 300-ERIEZ (3743) within the U.S. and Canada. For online users, visit www.eriez.com or send email to eriez@eriez.com. Eriez World Headquarters is located at 2200 Asbury Road, Erie, PA 16506.
